1 This is an H1

1.1 This is an H2

1.1.1 This is an H3

1.1.1.1 This is an H4

1.1.1.1.1 This is an H5

1.1.1.1.1.1 This is an H6

This is a text paragraph containing an ellipsis ... and followed by a horizontal rule.

This is inline `code`. This is a link[1]. *This is an* emphasized *span of text*. **This is a strongly emphasized span of text**.
This is a fenced code block:

```
\documentclass{article}
\begin{document}
  Hello world!
\end{document}
```

This is a bullet list:

- The first item of a bullet list
  that spans several paragraphs,

- the second item of a bullet list,

- the third item of a bullet list.

This is a compact bullet list:

- The first item of a bullet list,
- the second item of a bullet list,
- the third item of a bullet list.

Figure 1.1   Tux by Larry Ewing <lewing@isc.tamu.edu> (created in GIMP)

This is an ordered list:

5. The first item of an ordered list
    that spans several paragraphs,

6. the second item of an ordered list,

7. the third item of an ordered list.

This is an ordered list using hash enumerators:

1. The first item of an ordered list

that spans several paragraphs,

2. the second item of an ordered list,

3. the third item of an ordered list.

This is a compact ordered list:

5. The first item of an ordered list,
6. the second item of an ordered list,
7. the third item of an ordered list.

This is a compact ordered list using hash enumerators:

1. The first item of an ordered list,
2. the second item of an ordered list,
3. the third item of an ordered list.

This is a definition list:

Term 1 Definition 1

Term 2 Definition 2

Some code, part of Definition 2

Third paragraph of Definition 2.
Definition 3

This is a compact definition list:

Term 1 Definition 1
Term 2 Definition 2
Definition 3

This is a block quote:
> "This is the first level of quoting.
>> "This is nested blockquote."
>
> Back to the first level."

Here is a footnote reference[2] and another[3]. This is a ***farewell!***

---

[2] Here is the footnote.

[3] Here's one with multiple blocks.

Subsequent paragraphs are indented to show that they belong to the previous footnote.

```
Some code
```

The whole paragraph can be indented, or just the first line. In this way, multi-paragraph footnotes work like multi-paragraph list items.
